Abstract

In our previous article, it was explained that while our conscious operates as a digital computer, at subconscious level operates a quantum computer with a very high speed of computation and huge memory storage. It uses the coherent laser-type of waves of our weak but very important nonlinear electromagnetic field (NEMF), which works on the holographic principle and rules and regulates everything in the body through information signals. The previous article discussed the possibility to use the quantum computer for diagnosis. This article discuss the possibility to use the quantum computer for healing. In this article, we are going to show that when we meditate or pray we are accessing with information the quantum computer in our Subconscious. Our prayers for healing and our affirmations during meditation for life success work on the same information principle on which any other branch of our new informational energy (info-energy) medicine does.

1. Key words: How prayer and meditation heal; Nonlinear electromagnetic field (NEMF); Subconscious-the quantum computer; The quantum computer for healing; Waves of NEMF in the subconscious

2. Introduction

In our article [1], it was shown that at subconscious level operates a quantum computer with a very high speed of computation and huge memory storage, but we are not consciously aware of it. We know this from hypnosis, which puts the Conscious to sleep and allows access to the Subconscious. EEG measurements in Russia showed [2] that during prayer the conscious is turned off (just as it is during hypnosis). This means that prayer, just

as hypnosis; allow access to the Subconscious, where our quantum computer is. As shown in [1], the quantum computer operating in the Subconscious utilizes the coherent laser-type of waves of the human NEMF, which works on the holographic principle and from the Subconscious rules and regulates the functioning of all organs and everything else in the body. From here comes the importance of the Subconscious and our NEMF for our health and wellbeing – it influences the body in informational way (through waves) telling it what to do. This fact allows us to influence our health and wellbeing with informational request – prayer.

3. Prayer

Dr. William Harris did the following experiment. The patients in the Cardiological Division of the Hospital St. Lucas in Kansas City were divided into two groups. For the first group volunteers prayed for healing, for the second nobody prayed. Surprisingly, the group of patients, for which volunteers prayed, did better. They recover faster with fewer complications. Dr. William Harris concluded: "Supernatural mechanism was possibly involved" [2]. There is nothing supernatural - simply the quantum computer of their subconscious, which rules and regulates all the organs and everything else in the body, got involved in the healing.

Russian scientists from the Laboratory of Neuro and Psycho-physiology of the Psycho-neurological Institute Behterev recorded the EEG of seven graduates of the local Divinity School [2]. Prof. Slezin, chief of the Lab, was impressed by the changes in EEG during prayer; the brain frequencies were getting slower and slower until they reached 2-3 Hz. Such a thing has been observed only during the so-called "slow sleep", or on babies two months old or less when not sleeping.

The most devoted strongest believer had no brain activity recorded during prayer, regardless that he was in conscious. Prof. Slezin concluded that this switching off of the conscious (or switching off the reality) is probably the factor-playing role in the healing effect of prayer. However, the fact that hopeless cancer patients, who were sent home to die, recover completely only with prayer, means that something more than distancing from the reality plays role.

To what Prof. Slezin said, we will add: not only did the turned off conscious play positive role in the healing with prayer, this turning off of the conscious allows access to the quantum computer in the Subconscious, which operates with the waves of our NEMF and rules and regulates everything in the body on information basis-it tells the material body what needs to be done. Especially effective is the verbal prayer in front of a candle because the sound vibrations make the plasma of the candle to vibrate and the created electromagnetic waves influence the waves of our NEMF, located in the Subconscious, which rules and regulates all the organs and everything else in the body. This is where our quantum computer is, which operates with waves on the holographic principle [1]. So, the prayer is an energy-informational access, which influences the waves of our NEMF at subconscious level and brings

the desired healing. How exactly this is done? In 2001, the Russian scientist Acad. Garyaev wrote an article "Wave-based Biocomputer Functions of Our DNA" [2]. "The endogen weak physical fields are wave-based genetic information canal connecting the chromosomes of the different cells in a whole continuum." It is quantum nonlocal field, which allows all the cells, tissues, and the whole body to be in a super-coherent state [2].

Acad. Garyaev underlined that the chromosomes could simultaneously receive information and be sources of information in the form of nonlinear laser-type holographic torsion fields. It is a space-time holographic set, in which all the space-time information of the organism is recorded [2]. The concept of the Russian scientist is right, but all Russian scientists relate this to the conscious, when it should be related to the quantum computer of our Subconscious.

I came to this conclusion after I spent forty years of my life measuring the weak, but very important NEMF, which rules and regulates all the organs and everything else in the body. For that purpose, I developed and patented very sensitive noninvasive equipment, which can measure the weak NEMF; it is 1,000 times weaker than the body biocurrents [3-5]. However, it all started with the creation of my nonlinear mathematical model of one acupuncture meridian [6]. The nonlinear equation had a second solution - waves running from the point treated with acupuncture. A year later, Hungarian scientist experimentally confirmed the waves [7]. With the years, this lead to my understanding that our NEMF operates at subconscious level as a wave-based quantum computer [1].

The Russian Acad. Gurvich said that if the DNA information were nonlocal or informational in character, we could influence it and change it with information. Acad. Kaznacheev, after 40 years of work (in the Novosibirsk's Medical Institute), achieved unique results. Torsion generator was constructed and he was able to influence with torsion fields human cells and organs. When the generator created right torsion field (in clockwise direction), the cells of tissue cultures were positively stimulated and multiplied actively [2]. This was not a surprise for me because the acupuncture points are massaged clockwise (to the right) to increase their energy. It is this way because when massaging clockwise we create magnetic field toward the body (rule of the folded fingers of the right hand). Also in Russia, child epilepsy was successfully treated and a full recovery achieved with reading the hologram

memory of the DNA of the mother and projecting it on the child in hypo-geomagnetic camera. This allowed correction of the genetic defect. In the same way, with reading the hologram memory of the DNA of the mother and projecting it on the child in hypo-geomagnetic camera other genetic defects were also corrected and the diseases caused by them healed [2]. If with information we could correct even genetic defects, then we could with prayer or our mind (which is part of our NEMF) do similar miracles. The human NEMF is bioenergy-informational field, which from the Subconscious integrates energetically and informationally all the cells in the body in a well-coordinated organism. Since the emotional brain is in the Subconscious, and NEMF operates from the Subconscious, it is the link between our emotional, spiritual, and physical beings. This link, and its informational origin, through the information offered to the Subconscious during prayer, allows access to the quantum computer, which enhances our body's abilities to heal. Also, during meditation when affirmation for success in life is used, the quantum computer in the Subconscious is informationally accessed, which allows shift to a state of higher efficiency and success in life [8]. Since this is done through the Subconscious, where our emotional brain is, the more emotional our prayers and affirmations are, the more guaranteed are the positive outcomes.

4. Meditation

4.1. Meditation: is indelible part of Yoga and Yoga means united with God. So, both meditation and prayer have the purpose of uniting with God. As we shall see in this section, the meditation (just like prayer) put the Conscious to sleep to allow access to the Subconscious, where our NEMF is, which is the link between our emotional, spiritual, and physical beings. This link allows us during meditation to make (informational) request for healing, which leads to spontaneous remission or spontaneous healing.

The meditation has four basic steps [9]:

- Step 1: Changing the view point from self-centered to Universe Centered.
- Step 2: Stretching and relaxing all tense muscles.
- Step 3: Letting your mind run on an empty free regime.
- Step 4: Stopping the running of thoughts and switching off the conscious [9].

So, the final goal of meditation is to switch off the Conscious, so that the Subconscious can be accessed. For this to happen, it is suggested to sing

OMMMMMMM...because the vibrations from the sound OM make the whole sinus cavity vibrate. Adjacent are the frontal lobe and the pituitary gland, which also start vibrating. The Pituitary is the Master Gland that rules all the glands with internal secretions. Adjacent to the Pituitary is the Pinal Gland (the sixth gland with internal secretion), which also starts to vibrate. It is on top of Corpus Calosum, which like a bridge connects both brain hemispheres. The vibration of the Pineal Gland (from the singing of OM) activates the connection between both hemispheres, which facilitate the connection to the Subconscious, where our NEMF is, which operate on the holographic principle [1], and is obviously a hologram of the Creator [1]. For that reason, singing of OM has been always considered a way to connect with the Creator. Once you are connected to your Creator or to your real self, you need to ask what you really want for your health (prayer for health) or for your success in life (through affirmation during meditation). When praying for health see yourself healthy, when preying for success see yourself successful because your Subconscious works with images.

4.2. Spontaneous remission

Spontaneous remissions (or spontaneous healing) achieved during transcendental meditation were described in the books of Deepak Chopra. It is a way to access the Subconscious through meditation and to rely on its healing power. It is done through the quantum computer of the Subconscious. It is done through the waves of our NEMF, which rules and regulates the organs and everything else in the body from the Subconscious. If we can access the Subconscious with the faith that we are going to be healed, we will be healed. Usually before the cure will happen, just as before every subconscious revelation, the person feels enlightened and uplifted, and he knows for sure that he is going to be healed. Since the emotional brain is in the Subconscious, the Subconscious must be approached emotionally. Feel in advance the joy of being free from the disease, if you want your Subconscious to cure you, and have the deep faith that it is going to happen, and it will happen. In the same way, feel the joy of being successful in life when you make your affirmations during meditation and you will be successful in life.

5. Conclusion

Now in the 21st century, when we started using informational energy (info-energy) [10] medicine done through informational influence on our NEMF, which rules and regulates the organs and everything

else in the body from the Subconscious, it is time to acknowledge the opportunity to influence our health through information – prayer for health and to acknowledge the possibility for spontaneous remission during meditation [9]. On the same basis, we should acknowledge the opportunity to boost our success in life through affirmations during meditation [8].
